| Subject: | FW: Massive Dynamics Recruiting Princeton graduate students for data science roles |
| Date: | Friday, May 21, 2021 9:37:50 AM |

Dear all,

I hope you are all doing well as the academic year winds down!

I am passing along a message from a grad alum, Michael Fuccillo at Massive Dynamics who is hiring! He has posted the position in the Handshake system, but we know not all graduate student seeking industry positions are looking there. Please feel free to forward this to advanced graduate students in your department who are seeking opportunities. Thank you!

I wish you all a wonderful restorative summer!

Best wishes,
Amy

Amy L. Pszczolkowski (she, her, hers)

Massive Dynamics is looking forward to **adding 2–3 full-time data scientists to the team.** We are a small data science company in Princeton, NJ building data science products and infrastructure for major corporations.
Our main products aim to:
- Simulate and plan in-store promotions to maximize sales for Consumer Packaged Goods
- Optimize supply chain networks under uncertainty to maximize product fulfillment while minimizing supply chain risk (delays, bottlenecks, etc.)
We are also expanding into the pharmaceutical industry by building a data science product to help pharmaceutical companies manage and extract insights from high dimensional experiments.
If you are a current Masters or PhD student who is graduating soon or a recent graduate, we would love to hear from you. Below is the link to the opportunity:

Thanks again!

Sincerely,
Mike
